SOFTWARE ENGINEER | ENGINEERING LEAD | CLIENT DELIVERY

Bhopal, India | jshubham.vyas@gmail.com
shubham17vyas.github.io | [LinkedIn](#) | [GitHub](#)

Hands-on engineer with 8+ years building infrastructure software at C Squared Systems, now leading client delivery at Quilix AI. Experience spans backend systems, device integrations, database optimization, architecture, and cross-functional execution.

EXPERIENCE

Engineering Lead | Quilix AI Pvt Ltd

August 2025 - present | Bhopal, India

- Lead client projects from onboarding and scope definition through architecture and production delivery.
- Coordinate a small cross-functional team, resolve blockers, and communicate scope, risks, and timelines with clients.
- Worked on BOB (Book Organizing Bot), designed to automate repetitive data-entry work.

Software Developer | C Squared Systems, LLC

April 2017 - June 2025 | Auburn, New Hampshire, United States

- Built a reusable, device-agnostic data integration framework, reducing repository redundancy by approximately 20%.
- Optimized database queries to reduce execution time by approximately 50%; improved SNMP extraction speed by approximately 200% on average.
- Integrated RF, wireless, and power devices, including AGST Conflex Light, Samsung eFemto, and GE Infinity Power Plant.
- Contributed to energy-management automation with safety checks and phased testing; supported automated tests, continuous integration, and mentoring.

Software Developer Intern | RentalOnMe.com

February 2016 - May 2016 | Logan, Utah, United States

- Developed and maintained product code and databases; contributed to testing, troubleshooting, and feature delivery.

TECHNICAL & DELIVERY STRENGTHS

Backend & data: Python, PHP, SQL, MySQL, C#

Devices & web: SNMP, HTTP, TypeScript, JavaScript

Recent project toolkit: FastAPI, SQLAlchemy, Alembic, Pytest, Ruff, MyPy, Git, GitHub

Delivery: Requirements, architecture, planning, QA coordination, stakeholder communication

EDUCATION

Utah State University - Jon M. Huntsman School of Business

M.S., Management Information Systems | 2015 - 2016 | Grade: 3.63

Rajiv Gandhi Prodyogiki Vishwavidyalaya (RGPV)

Bachelor of Engineering, Computer Science | 2010 - 2014 | Grade: 3.4

INDEPENDENT PROJECTS - IN DEVELOPMENT

TradEngine: Desktop market-analysis and trading workspace. **Glory:** Competition-driven personal improvement.

Aarambh: Reusable backend foundations with documentation and tests.
